Latest and Most Accurate CompTIA CV0-002 Exam Dumps:

Version: 8.0

Question: 1

A new browser version has been deployed to all users at a company. After the deployment, users report that they can no longer access the company's secure time-card system, which is hosted by a SaaS provider. A technician investigates and discovers a security error is received upon opening the site. If the browser is rolled back to the older version, the site is accessible again. Which of the following is the MOST likely cause of the security error users are seeing?

- A. SSL certificate expiration on the SaaS load balancers
- B. Federation issues between the SaaS provider and the company
- C. Obsolete security technologies implemented on the SaaS servers
- D. Unencrypted communications between the users and the application

Answer: C

Question: 2

Due to a competitor's unlimited data plan, a service provider is struggling and wants to transform its business services to be more hosting oriented. A cloud architect is tasked to review current cloud resource capacity and provide recommendations and a plan for better resource utilization. Given the following report:

Which of the following is the BEST option for the architect to suggest?

- A. Downsize by migrating all media services to one server and decommission two servers.
- B. Downsize by decommissioning servers 2 and 3 and reallocate media servers to hosts.
- C. Downsize by migrating all media services to one server, add one host server, and decommission one server.
- D. Upsize the hosting services by turning server 1 into a host server.

Answer: A

Question: 3

A cloud administrator is receiving alerts that the disk on several systems is 90% full. Upon reviewing the systems, the administrator determines that the log directory is using 50% of the disk. The company has a 14-day retention policy for all logs. Which of the following is the BEST solution to implement to minimize future alerts?

- A. Orchestrate a job to rotate the logs and upload to external storage.
- B. Delete any log files in the directory that are larger than 20MB.
- C. Archive the existing logs in the directory and upload to external storage.
- D. Add additional storage space to the log directory for the servers.

Answer: A

Question: 4

A company is seeking a new backup solution for its virtualized file servers that fits the following characteristics:

The files stored on the servers are extremely large.

Existing files receive multiple small changes per day.

New files are only created once per month.

All backups are being sent to a cloud repository.

Which of the following would BEST minimize backup size

- A. Local snapshots
- B. Differential backups
- C. File-based replication
- D. Change block tracking

Answer: B

Question: 5

A company has deployed a four-node cluster in a COLO environment with server configurations listed below. The company wants to ensure there is 50% overhead for failover and redundancy. There are currently eight VMs running within the cluster with four vCPUs x32GB each. The company wants to better utilize its resources within the cluster without compromising failover and redundancy. Given the information above, which of the following should a cloud administrator do to BEST accommodate failover and redundancy requirements?

- A. Ensure hyperthreading is being utilized with physical server CPUs.
- B. Ensure dynamic resource allocation is being utilized.
- C. Overcommit memory, and the systems will allocate resources as required.
- D. Set hard limits for VM resources and turn on hyperthreading.

Answer: B

Question: 6

A courier company has virtualized its packing software application. The CSA needs to confirm the deployment is utilizing the correct amount of CPU per virtual instance. After confirming the deployment requirements, the CSA should log into the cloud services portal to ensure that:

- A. the VMs with the most CPU cores available have been selected.
- B. smaller VMs are being selected to reduce the total deployment cost.
- C. the deployment is utilizing the recommended amount of CPUs per VM.
- D. the alarms on CPU utilization have been enabled.

Answer: C
